SUMMARY

Frontend-focused Full Stack Engineer with **1+ years of experience** in **React, Next.js, TypeScript, and JavaScript**, along with backend development using **Node.js, Symfony, and Laravel**. Built and maintained **social platforms, AI-driven apps, and REST APIs** with secure authentication and optimized databases. Strong in responsive UI development, API integration, and production deployments.

SKILLS

Programming Languages   JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP
Frontend   React.js, Tailwind CSS, Responsive UI, Component-Based Architecture, Next.js
Backend   Node.js, Express.js, REST APIs, PHP, Symfony, Laravel
Database   Mysql, Supabase SQL, Firebase, MongoDB
Tools   Git, GitHub, Postman, VS Code, Vercel, Deployment Workflows
Languages   Hindi, English

EXPERIENCE

Co-Founder || Full-stack Developer   Jul '24 — Jul '25
Persist Ventures   California, United States
Worked on both backend and frontend technologies, building their WebApp in ReactJS, and worked on Symfony PHP backend, and built lots of REST APIs.
- **Technology used:** PHP, Symfony, NextJS, ReactJS, Redux, JavaScript, HTML, CSS, and SASS.

Software Product Developer   Oct '22 — Jan '23
Silver Oak Health   Banglore, India
Designed backend using Laravel, managed database operations using DBeaver & MySQL, integrated REST APIs, and frontend using HTML, CSS, JS.
- **Technology used:** Laravel, PHP, MySQL, HTML, CSS, JS, Bootstrap, DBeaver, REST API.

Software Developer   Oct '21 — Jan '22
SISL Infotech   New Delhi, India
E-Commerce Website: developed responsive UI with Vue.js and ReactJS, implemented auto-sliding cards, multi-page form flows, and authentication, built the Contact Page, and integrated SocialLinks.
- **Technology used:** Vue.js, ReactJS, HTML, CSS, Bootstrap, jQuery.

PROJECTS

Empowerverse, Persist Ventures Link   California, United States
- Built features for a personalized media platform focused on meaningful and value-based content discovery.
- Implemented frontend UI and backend APIs to support user-centric recommendations and engagement.
- **Technologies:** React.js, Node.js, JavaScript, REST APIs, SQL/NoSQL, Tailwind CSS

WeMotions – Social Media Platform, Persist Ventures Link   California, United States
- WeMotions is a pioneering social platform that reimagines video interaction by merging real-time conversations with meaningful social connections. WeMotions empowers users to engage spontaneously in authentic, face-to-face dialogues that foster genuine community and deeper engagement.
- Built REST APIs for posts, replies, reactions, tags, and the follow system using Symfony and MySQL
- Implemented JWT authentication, sequential reply chains, and personalized feeds
- **Technologies:** PHP, Symfony, Nextjs, Reactjs

AgentVerse – AI Social Platform Link
- Built a feature-sliced social platform where AI agents and users interact with posts, images, and voice communication.
- Implemented scalable UI components and interactive user feeds with real-talk features.
- **Technologies:** React, TypeScript, Supabase SQL, AI API integration

AI-Chef – Recipe App Using AI Link
- Frontend app integrating AI logic to generate recipes based on user input.

- Implemented clean UI and modular components for scalability.
- **Technologies:** React, TypeScript

Personal Portfolio Website Link
- Designed and deployed a personal portfolio showcasing skills, social links, and featured projects.
- **Technologies:** React, JavaScript, Tailwind CSS with live hosting.

SmartFit AI – E-Commerce App Link
- Built a React e-commerce solution for clothing fit recommendations using AI-based size prediction.
- Included product browsing, cart functions, and size-recommendation workflows.
- **Technologies:** React, Tailwind CSS, TypeScript

AI-Habit-Coach Link
- Developed a habit tracking and coaching app using AI logic and smart recommendations.
- Features include goal setting, adaptive suggestions, and UI stateflow management.
- **Technologies:** TypeScript, React

EDUCATION

MCA in Computer Applications, Swami Vivekanand Subharti University

Sep '19 — Apr '22
Meerut, India
- Studied core subjects including Java, Data Structures, DBMS, Web Technologies, Software Engineering, and Operating Systems with practical project experience.

B.SC in computer science, maths, and physics, Lucknow University

Jul '14 — Mar '18
Lucknow, India
- Focused on programming fundamentals, data structures, algorithms, mathematical problem-solving, and core physics concepts, building a strong analytical and logical foundation for software development.

ACHIEVEMENTS

• Delivered multiple REST APIs tested using Postman.
• Optimized database queries to improve backend response time.
• Active GitHub contributor with real-world projects.

CERTIFICATIONS

WebPage Design, UPTEC
